EDUCATION

B.S. Computer Science — Software Engineering Concentration Aug 2022 – Dec 2026
Louisiana State University · Academic Scholarship Recipient (Fall 2022, Spring 2023)

- 70+ credit hours across systems, software engineering, databases, cybersecurity, and theory
- Member, BengalBots-LSU Robotics Organization

High School Diploma — El Buen Pastor Episcopal Bilingual School Graduated June 2022
Bilingual institution (Spanish/English) · GPA: 3.7

TECHNICAL SKILLS

Languages: Python, JavaScript, C, C++, Java, C#, OCaml, Rust, Ruby, SQL, T-SQL
Web: HTML5, CSS3, React, Node.js, REST APIs, VS Code Extension API, ESBuild
Databases: PostgreSQL, relational design, query optimization, normalization (1NF-3NF), stored procedures
Tools: Git, GitHub, Claude Code CLI, Gemini CLI, IDA Pro, WinDBG, Docker, Linux (Ubuntu), macOS, Windows
Domains: Cybersecurity · Malware Analysis & Reverse Engineering · Compiler Construction · Full-Stack Web · LLM-Assisted Development

PROJECTS

Personal Finance Dashboard 2026
React (Vite) · Node.js · Express · PostgreSQL · JWT

- Building a full-stack web app for logging income and expenses by category with spending trend visualizations
- Designed a normalized PostgreSQL schema across 3 tables (users, categories, transactions) with a full CRUD API
- Implemented JWT authentication with protected routes and a React frontend connected to the backend

Ransomware Threat Group Analysis — CSC 4700 Cybersecurity Research 2025-2026
Python · Data Analysis · REST API · JSON · CSV · Claude Code CLI · Gemini CLI

- Built a 3-layer threat intelligence pipeline: HTML scraper, REST API ingestion layer, and an enrichment layer applying keyword filtering, Google News RSS validation, regex deduplication, and linear regression trend modeling
- Analyzed five active ransomware groups (Qilin, Akira, Play, TheGentleMan, Incransom) including TTPs, victim sectors, and cross-group re-extortion overlap cases
- Used Claude Code CLI and Gemini CLI throughout development to accelerate pipeline design and analysis

Compiler Construction — CSC 4351 Spring 2026
Java · C · AST · Semantic Analysis · Symbol Tables

- Built a multi-pass compiler outputting C and Java; owned the semantic analysis pass covering declarations, statements, and conditionals
- Implemented symbol table and scope infrastructure integrated with teammates' lexer, parser, and code generation passes
- Worked directly with AST traversal, type checking rules, and error reporting to catch semantic errors before code generation

Malware Analysis & Reverse Engineering — CSC 4700 2025-2026
IDA Pro · WinDBG · x86 Assembly · Python

- Analyzed UPX-packed anti-VM binaries, a two-level obfuscated virus (Harulf), a UDP worm payload, and a DOS-era COM virus across multiple lab assignments
- Performed dynamic analysis with WinDBG on live malware samples; patched anti-debug rdtsc timing checks by modifying conditional jumps in IDA Pro
- Produced fully commented disassemblies with PlantUML stack diagrams and structured lab reports

Mom's Fridge — Recipe Management Web Application (CSC 4330) 2024-2026
HTML · CSS · JavaScript · Node.js

- Built a full-stack recipe discovery and meal planning app across 3 milestone phases with 78 commits
- Implemented user authentication, dark mode UI, recipe search, and image upload functionality
- Followed agile SDLC with documented deliverables and team code reviews

Supermarket Database System — CSC 4402 2025

Python · SQL · Relational Database Design

- Designed a normalized relational schema (1NF-3NF) for inventory and transaction management
- Wrote complex queries with multi-table joins, aggregations, subqueries, and stored procedures

WORK EXPERIENCE

IT Support Technician Summers 2022 – Present

Fajardo & Associates Law Office / Lotificacion Miguel Calvo / Inversiones Multiples Urbe

- Maintained and troubleshot hardware, software, networks, and POS systems across three business environments (legal, real estate, retail pharmacy)
- Managed digital document security and backup workflows for sensitive legal records in a bilingual (English/Spanish) environment
- Reduced recurring IT issues through preventive maintenance schedules and staff training on digital tools

Inventory Assistant July 2022

Farmacia Regis

- Managed monthly inventory entry in pharmacy management software and assisted with point-of-sale operations

RELEVANT COURSEWORK

Advanced Data Structures & Algorithm Analysis · Operating Systems · Database Systems · Computer Organization & Design · Programming Languages · Software Systems Development · Systems Programming · Object-Oriented Design · Discrete Structures · Engineering Statistics · Numerical Methods · Ethics in Computing · Malware Analysis & Reverse Engineering · Compiler Construction · Introduction to Cybersecurity (In Progress) · Artificial Intelligence (In Progress)

ACTIVITIES & VOLUNTEER WORK

- BengalBots-LSU Robotics Organization — GitHub contributor
- El Buen Samaritano (2018) — Organized activities for children and donated holiday care packages
- Trabajo Educativo Social (2021-2022) — Community service: tree planting and public garden restoration
