PROFESSIONAL SUMMARY

Computer Science student at Louisiana State University pursuing a B.S. with a Software Engineering concentration (expected December 2026). Experienced in Python, C#, Java, C, C++, SQL, and functional languages (OCaml, Rust, Ruby). Proven ability to build full-stack web applications, database systems, and cybersecurity research tools. Bilingual in English and Spanish. Actively seeking software engineering internships or entry-level roles.

EDUCATION

B.S. Computer Science — Software Engineering Concentration – Louisiana State University Aug 2022 – Dec 2026 (Expected)

Academic Scholarship Recipient – Fall 2022 & Spring 2023

- Completed 70+ credit hours in core CS, systems, software engineering, databases, and theory
- Active in BengalBots-LSU robotics organization and CSC 4402 Project team

High School Diploma – El Buen Pastor Episcopal Bilingual School

Graduated June 2022

Bilingual institution (Spanish/English) | GPA: 3.7

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, C#, Java, C, C++, Rust, OCaml, Ruby, SQL, T-SQL

Web Technologies: HTML5, CSS3, Node.js, VS Code Extension API, ESBUILD, REST APIs

Databases: SQL, T-SQL, Relational Database Design, Query Optimization, Normalization

Tools & Platforms: Git, GitHub, VS Code, Microsoft Office Suite, Google Workspace, ESLint, Prettier

Operating Systems: Windows, macOS, Linux (Ubuntu)

Domains: Cybersecurity, Malware Analysis, Software Engineering, Game Development, Database Systems

Soft Skills: Bilingual (English/Spanish), Technical Communication, Problem Solving, Team Collaboration

PROJECTS

Ransomware Group Analysis — CSC 4700 Cybersecurity Research | Python, Data Analysis, JSON, CSV
2025–2026

- Collaborated with a 3-person team to analyze ransomware threat actor behavior, attack patterns, and incident response strategies
- Developed time-series analysis and projection scripts in Python to model ransomware attack frequency trends
- Produced structured qualitative research documentation covering threat intelligence and organizational impact

Mom's Fridge — Recipe Management Web Application (CSC 4330) | HTML, CSS, JavaScript, Node.js 2024–2026

- Developed a full-stack web application for recipe discovery and meal planning as a collaborative software engineering group project (78 commits across 3 milestone phases)
- Implemented user authentication (login/signup), dark mode UI, recipe search functionality, and image upload
- Followed agile software development lifecycle with documented milestone deliverables

CSC 4402 Supermarket Database System | Python, SQL, Relational Database Design 2025

- Designed and implemented a normalized relational database schema for a supermarket inventory and transaction management system
- Wrote complex SQL queries involving multi-table joins, aggregations, subqueries, and stored procedures
- Applied database normalization principles (1NF through 3NF) and ER modeling best practices

Programming Languages Coursework (CSC 4401) — Multi-Paradigm Implementations | OCaml, Rust, Ruby 2025

- Implemented functional programming concepts in OCaml: recursion, pattern matching, higher-order functions, and algebraic data types
- Wrote unit-tested OCaml modules using the OUnit testing framework covering tuples, list operations, and tree structures
- Completed homework series in Rust exploring ownership/borrowing and in Ruby for scripting and OOP paradigms

WORK EXPERIENCE

IT Support Technician – Fajardo & Associates Law and Notary Office Summers 2022–Present

- Provide bilingual (English/Spanish) technical support for computers, printers, and office software for a legal environment
- Perform preventive system maintenance and network troubleshooting for office infrastructure
- Manage digital document organization, backup solutions, and data security awareness for sensitive legal records

IT Support Technician – Lotificación Miguel Calvo S.A. de C.V. (Real Estate Dev.) Summers 2022–Present

- Set up and maintain hardware and software systems to support real estate office operations
- Improved workflow efficiency by optimizing digital tools and resolving connectivity issues

IT Support Technician – Inversiones Múltiples Urbe S. de R.L. (Drug Store) Summers 2022–Present

- Support POS systems, inventory tracking software, and security camera infrastructure
- Troubleshoot hardware and software issues to ensure daily IT continuity in a retail environment

Inventory Assistant – Farmacia Regis (Pharmacy) July 2022

- Entered and managed monthly inventory data in pharmacy management system; assisted with product sales

RELEVANT COURSEWORK

Advanced Data Structures & Algorithm Analysis | Operating Systems | Database Systems | Computer Organization & Design

Programming Languages | Software Systems Development | Introduction to Systems Programming | Object-Oriented Design

Numerical Methods | Engineering Statistics | Discrete Structures | Ethics in Computing

Malware Analysis & Reverse Engineering (In Progress) | Video Game Design (In Progress) | Compiler Construction (In Progress)

Introduction to Cybersecurity & Cyber Defense (In Progress) | Artificial Intelligence (In Progress)

CERTIFICATIONS & ACTIVITIES

- Introduction to Java – Codecademy (Completed August 2025)
- BengalBots-LSU Robotics Organization – GitHub contributor
- Volunteer – El Buen Samaritano (2018): Organized activities for children and donated holiday care packages
- Trabajo Educativo Social (2021–2022): Community service — tree planting and public garden restoration
